FORTEPIANO

2025

design_AL Studio

Il fascino è misterioso perché frontalmente non rivela nulla della sua essenza, il nome è evocativo perché invertendone le parti può essere interpretato come uno strumento per comporre la propria sinfonia di relax (proprio come un pianoforte) o letteralmente ne esprime i concetti cardine di consistenza, solidità, massività. Una potenza, quella della materia con cui è realizzato, capace di raccontare tutta la sua forza proprio grazie alla purezza e all'essenzialità delle linee, nitide e assolute. Fortepiano non è solo una collezione di prodotti è un nuovo pensiero di lavorare i piani in marmo da massello, modulari o a misura, nel quale vengono scavati, senza soluzione di continuità, lavabi tondi, ovali, quadrati o rettangolari. Una superficie continua quindi, sulla quale si aprono vuoti e depressioni che accolgono l'acqua, quasi come fosse la sua forza a scavare la materia. I piani possono essere utilizzati a mensola libera oppure integrati con i diversi programmi di mobili della gamma antoniolupi. Nel primo caso, il progetto mette in risalto lo spessore del piano e la sua immagine assoluta, nel secondo le infinite sfumature del marmo dialogano con i colori e le texture dei frontali dei mobili contenitori. Fortepiano può ospitare a richiesta un porta salviette che può essere scavato direttamente nella parte finale del piano in marmo senza aggiungere nessun elemento accessorio che ne possa minare l'immagine assoluta.

The charm is mysterious because from the front it reveals nothing of its essence, the name is illustrative because by inverting its parts it can be interpreted as an instrument for composing its own symphony of relaxation (just like a piano) or literally expresses its pivotal concepts of consistency, solidity, massiveness. A power, that of the material with which it is made, capable of telling all its strength precisely thanks to the purity and essentiality of the lines, sharp and absolute. Fortepiano is not only a collection of products, but also a new way of thinking about working with marble countertops from solid, modular, or made-to-measure marble, into which round, oval, square or rectangular sinks are carved seamlessly. A continuous surface, then, on which voids and depressions open to accommodate water, almost as if its force were excavating the material. The tops can be used as free shelves or integrated with the different furniture collections in the antoniolupi range. In the former case, the design highlights the thickness of the top and its absolute image, in the latter, the infinite shades of marble dialogue with the colors and textures of the fronts of the storage furniture. Fortepiano can accommodate, upon request, a towel rail that can be carved directly into the end of the marble top without adding any accessory element that would undermine its absolute image.
