STREET_LIGHT

2025

design_AL Studio

Un progetto che rivela la sua originalità nelle infinite declinazioni disponibili, uno strumento compositivo che disegna lo spazio e l'area lavabo all'interno di ambienti bagno di diversa forma e dimensione, un elemento architettonico che caratterizza l'ambiente lasciando alla materia il ruolo da protagonista. STREET si amplia nella sua versione più essenziale con STREET LIGHT che preserva il dna del lavabo originale e lo declina con maggiore leggerezza laddove è necessario. Il carattere è quello di un elemento monolitico, una mensola lineare che integra al suo interno bacini e piani di appoggio senza soluzione di continuità. Frontalmente le vasche (nelle dimensioni di 54 o 73 cm, singole o doppie) sono celate alla vista sia nella versione sospesa, sia nella variante incassata nel mobile. L'acqua che fuoriesce dai rubinetti da appoggio o a parete sembra scomparire all'interno della materia, viene inghiottita dalle sue venature, "scava" canyon tra marmi e pietre. Ancora una volta la natura si incontra attraverso la creatività dell'uomo e il suo saper fare. La differenza è tutta nell'altezza, i 25 cm di Street scendono a 15 cm per Street Light, rendendo l'immagine più eterea e la sensazione di sospensione e leggerezza ancora più accentuata. Street ha tracciato una direzione, ridefinito i principi dell'area lavabo, proposto una soluzione innovativa per progetti sartoriali. Un progetto arredo custom made, sia dal punto di vista dimensionale, sia nell'ampia scelta di marmi e pietre di antoniolupi, da apprezzare sia nella loro versione più libera, sia nell'incontro con le finiture e cromie del mobile. Per trasmettere identità allo spazio, per rendere unico ogni ambiente.

A design that reveals its originality in the infinite declinations available, a compositional tool that designs the space and the sink area within bathroom environments of different shapes and sizes, an architectural element that characterizes the environment while leaving the material the starring role. STREET is expanded in its most essential version with STREET LIGHT, which preserves the DNA of the original sink and declines it with greater lightness where it is needed. The character is that of a monolithic element, a linear shelf that seamlessly integrates basins and countertops inside. From the front, the basins (in sizes of 54 or 73 cm, single or double) are concealed from view both in the suspended version and in the recessed variant in the cabinet. The water leaking from the countertop or wall-mounted taps seems to disappear within the material, swallowed by its veins, "digs" canyons between marble and stone. Once again, nature meets through man's creativity and know-how. The difference is all in the height; the 25 cm of Street drops to 15 cm for Street Light, making the image more ethereal and the feeling of suspension and lightness even more pronounced. Street has mapped out a direction, redefined the principles of the sink area, proposed an innovative solution for tailor-made projects. A custom-made furniture project, both in terms of size and in the wide choice of antoniolupi marbles and stones, to be appreciated both in their freest version and in the encounter with the finishes and colors of the furniture. To convey identity to the space, to make each room unique.
