Bubble

Bubble

Dynamic modular bookcase

Design by Gianmarco Miolo

EN In the beginning there was the shelf: a small/large island hanging on the wall to stow books and sundry objects. But then that was no longer enough and so the bookcase was born, gathering the shelf-islands and multiplying the space for things. Even bookcases, however, have a flaw: they offer a home to many objects as long as they do not exceed a certain size. And once objects are accommodated, they all tend to make everything look the same. This is why Bubble was designed.

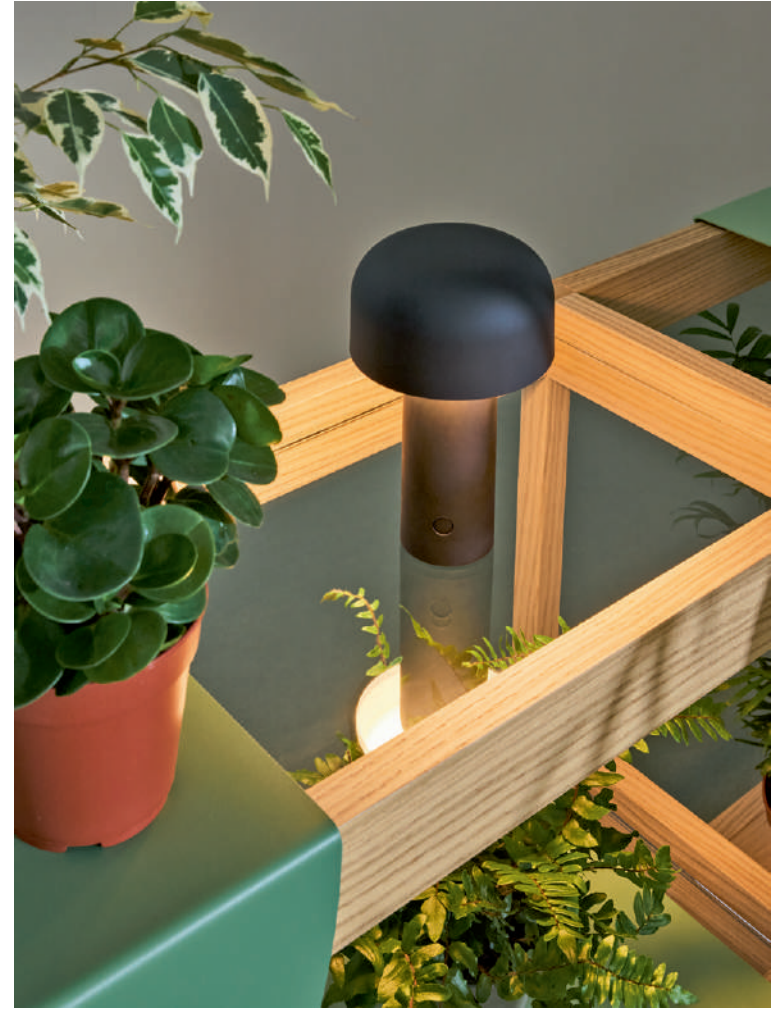

IT In principio fu la mensola: una piccola/grande isola appesa al muro per riporre libri e oggetti. Poi la mensola non bastò più e nacque la libreria, unendo le mensole e moltiplicando lo spazio disponibile. Anche le librerie, però, hanno un difetto: danno un posto a tantissime cose, purché non superino una certa misura. E una volta che le accolgono, le fanno sembrare tutte uguali. Per questo è nata Bubble.

EN Bubble is much more than a bookcase: it is the pleasure of putting things in order, giving each object its natural location, the one they would choose if they could do it themselves. High and low, wide and narrow, short and long: each object coexists happily within this extended family where, instead of the traditional shelves, there are removable ones and colored bubble-shaped trays that can be moved at will along the horizontal crosspieces. And where there are no shelves or trays, Bubble transforms into an architectural framework that showcases objects of different height, as in a skyline.

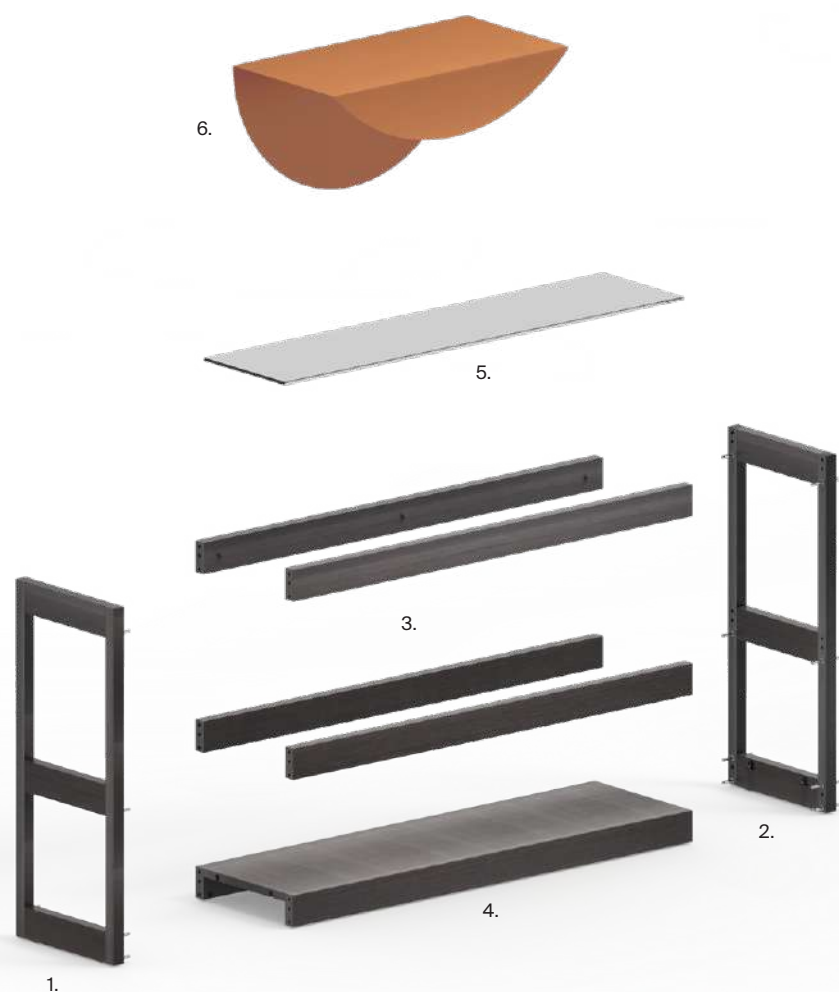

IT Bubble è molto di più di una libreria: è il piacere di mettere a posto le cose dando a ciascuna la sua collocazione naturale, quella che sceglierebbero se potessero farlo da sole. Alti e bassi, larghi e stretti, corti e lunghi: tutti convivono felicemente dentro questa famiglia allargata dove al posto dei soliti ripiani ci sono mensole rimovibili e vassoi colorati a forma di bolla da spostare a piacimento lungo i traversi orizzontali. E quando mensole e vassoi non ci sono, Bubble diventa l'architettura che incornicia oggetti di altezze diverse, come in uno skyline.

- Components**
1. Side frame
 2. Intermediate frame
 3. Crosspieces
 4. Inspectable base
 5. Wooden or glass shelf
 6. Powder-coated metal tray

- Componenti**
1. Telaio laterale
 2. Telaio intermedio
 3. Traversi
 4. Basamento ispezionabile
 5. Ripiano in legno o in vetro
 6. Vassoio in metallo verniciato a polvere

BUBBLE IS DESIGNED FOR

BUBBLE È PENSATA PER

X

Those who are tired of furniture that imposes its own shape on things. With Bubble, the contents themselves configure the library: when an object changes, so does the container. And practicality benefits from this.

Chi è stanco dei mobili che impongono le proprie forme alle cose. Con Bubble sono gli oggetti che configurano la libreria: quando cambia il contenuto, cambia anche il contenitore. E la praticità ne guadagna.

Y

Those looking for furniture to be more than a mere tool that fulfils a function, but is something that adds meaning and value to the landscape of the home.

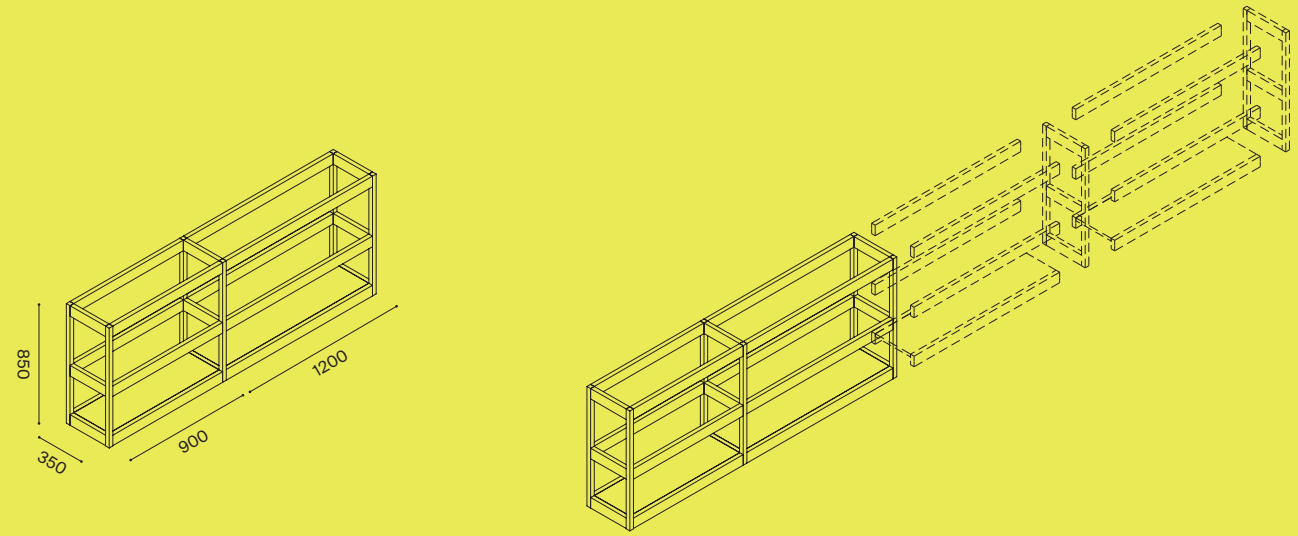

Chi cerca in un arredo non soltanto uno strumento per soddisfare una funzione, ma qualcosa che aggiunge senso e valore al paesaggio della casa.

Z

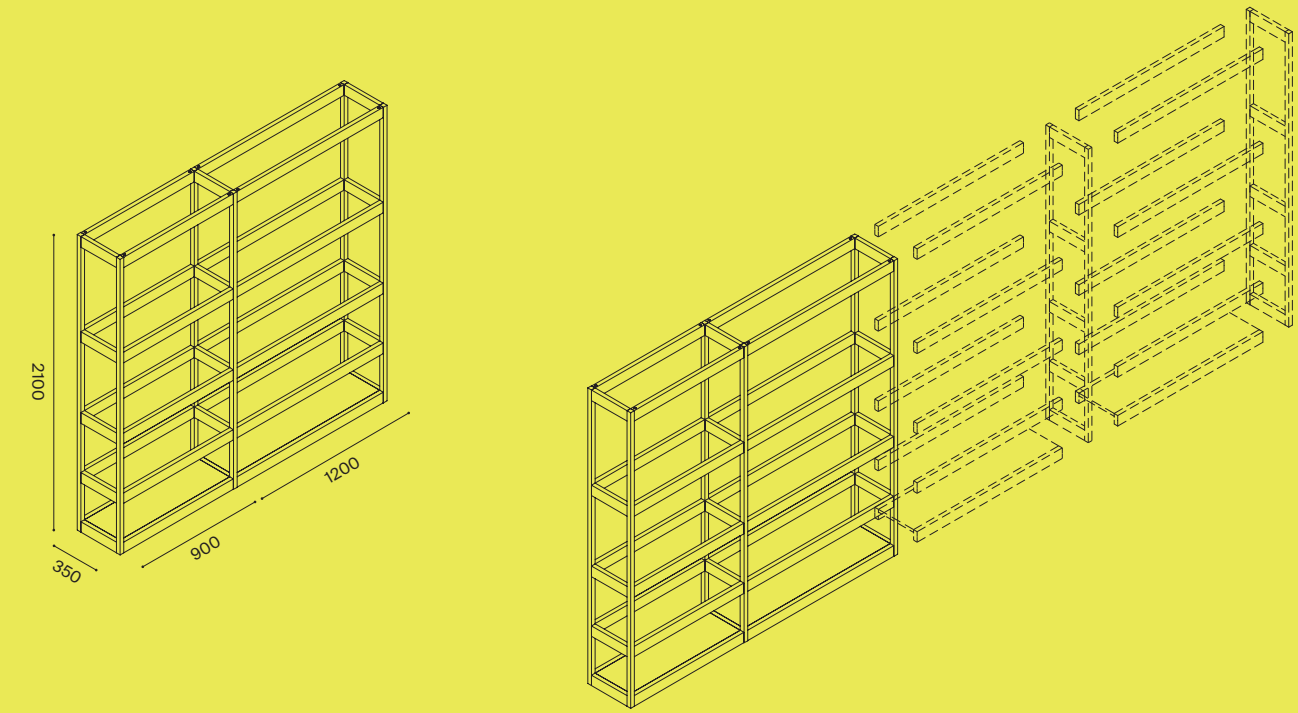

Those who care about the environment. Each element of Bubble has been designed to be shipped flat, reducing its ecological footprint.

Chi ha a cuore l'ambiente. Ogni elemento di Bubble è pensato per essere spedito in modo compatto, riducendo l'impatto ecologico.

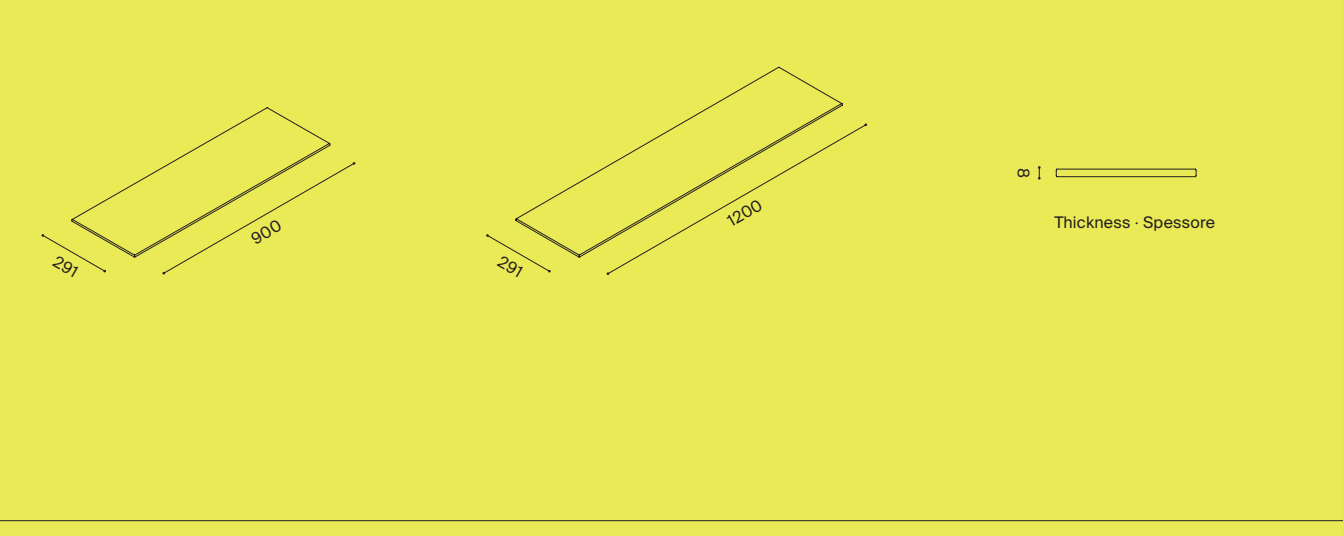

Bubble low: 900mm or 1200mm modules
Bubble bassa: moduli da 900mm o 1200mm

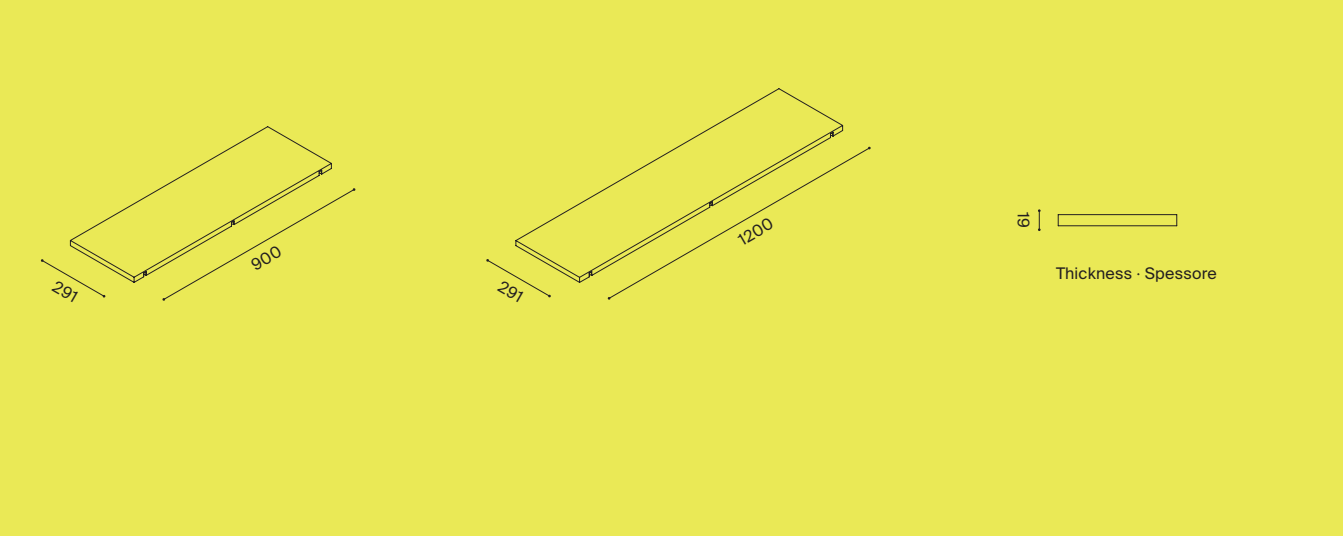

Bubble high: 900mm or 1200mm modules
Bubble alta: moduli da 900mm o 1200mm
