In-To

In-To

Space divider system

Design by Xilia R&D

EN Let's face it: sometimes, the home and the office can be quite a puzzle. We want communal spaces, but we love being on our own. We seek privacy, but we really like being with others. In-To is the solution for those who want everything and its opposite, even at the same time.

IT Diciamo la verità: certe volte, la casa e l'ufficio sono un bel rompicapo. Vogliamo spazi da condividere, ma amiamo restare ognuno per conto nostro. Cerchiamo la privacy, però ci piace tantissimo stare con gli altri. In-To è la soluzione per chi vuole tutto e il suo contrario, anche nello stesso momento.

EN An innovative and refined system of self-supporting wooden slats that intercepts the spaces without completely separating them. It ensures intimacy but does not become a boundary. It lets the light through but filters it when it is too strong. In-To is like an elegant and discreet referee who steps in to direct the game. A spacer that distances and brings closer together at the same time, the missing regulator that multiplies the space allowing everyone to be on their own in harmony with others.

IT Un sistema innovativo e raffinato di doghe autoportanti in legno che intercetta gli spazi senza separarli. Assicura intimità ma non diventa un confine. Fa passare la luce filtrandola quando è troppa. In-To è come un arbitro elegante e discreto che arriva per dirigere il gioco. Un distanziatore che allontana e riavvicina contemporaneamente, il regolatore che mancava per moltiplicare lo spazio lasciando che ognuno viva il suo in armonia con l'altro.

- Components**
- 1. Upper fixing bushing
 - 2. Upper slat terminal for pushing locking
 - 3. Integrate compression pushing system
 - 4. Wood slat
 - 5. Bottom slat terminal for hooking to the floor
 - 6. Ground fixing base
 - 7. High-strength die-cut double-sided adhesive

- Componenti**
- 1. Boccola di fissaggio superiore
 - 2. Terminale superiore doga per bloccaggio spintore
 - 3. Sistema di innesto integrato a compressione
 - 4. Doga in legno
 - 5. Terminale inferiore doga per aggancio a pavimento
 - 6. Basetta di fissaggio a pavimento
 - 7. Biadesivo fustellato ad alta tenuta

IN-TO IS DESIGNED FOR

IN-TO È PENSATO PER

X

Those looking for practicality and fine details. The concealed slat fastening system guarantees a simple and intuitive installation, without requiring drilling at the base. It adapts to any imperfections of the floor and ceiling, thanks to its integrated compression pushing mechanism.

Chi cerca la praticità e i bei dettagli. Il sistema di aggancio delle doghe a scomparsa consente un’installazione anche senza fori a terra, in modo semplice, veloce e intuitivo, adattandosi alle imperfezioni del pavimento e del soffitto, grazie all’innesto a compressione.

Y

Those who want a universal system that can be customized to suit personal taste.

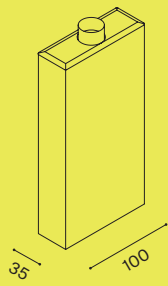

Chi vuole un sistema universale ma personalizzabile a seconda del proprio gusto.

Z

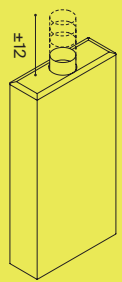

Those looking for accessories designed to give the wall further aesthetic functionality.

Chi cerca degli accessori pensati per dare alla parete funzionalità oltre all’estetica.
